

Startup Incubator cum Centre of Excellence Faridabad in association with Department of Higher Education Haryana started in October 2019 with an aim to foster startup culture and entrepreneurship amongst the college students. Keeping the same motto in mind the centre has conducted various mentoring sessions for the students wherein the students were explained about the concept of the incubation centre and how students can take up entrepreneurship as a career option. Students can do their own startup with the help of the team present at the incubation centre.

The team at Incubation centre has also organised a series of mentoring sessions in association with various external guest speakers wherein the students got a chance to interact with the guest speaker and understood the importance of doing a startup. The centre has also organised a one week mentoring session on the occasion of Women's Day, and that particular week was named as Women Entrepreneur Week to celebrate the women empowerment and also to give exposure and learn from the experience of multiple external guest speakers along with the centre head of the incubation centre. The team has also organised sessions covering topics like personality development, skills development, confidence building programmes etc. The centre has also organised a one week awareness session for the respective faculty members of Pt. Jawaharlal Nehru Govt. College where the lecturers from the different departments were briefed about the incubation centre and how they can guide the students in learning more about startup culture and entrepreneurship. The Awareness workshops made a big difference in the thinking process of the students and unemployed Alumni of the college, the outcome of these awareness workshops was very much visible when the students/alumni started discussing about their own ideas & few of them even have started working on them. With the help of the numerous awareness sessions the team has been able to mentor thousands of students resulting in the generation of startup ideas amongst the college students. The team has been able to successfully register 5 startups at the centre and also received applications from the students who have started working on their ideas and getting them validated at the earliest. Startup Incubator cum Centre of Excellence is working relentlessly to develop a framework which instils practical experience in the education and encourage college students to take up entrepreneurship as a career path. In this series of the students' achievements under the guidance of incubation centre we can also include the success of two students of our esteemed college G.C. Faridabad, Economics department Himanshu (MA-1) secured first position and Komal (MA-1) secured second position in the Idea kriti 4.0 the startup pitching competition organised by the Incubation centre on 3rd Nov 2023. The competition witnessed participation from students from all the departments and pitched their ideas with PPT to three judges panel. The prize money for 1st and second position were 5k and 3k respectively.
